

Department of Wildlife, Fisheries and Aquaculture

Major Advisor: Dr. Samuel Riffell

Office: 205A Thompson Hall

Sustainable management of the diverse wildlife and fisheries resources by private and public sectors, requires knowledgeable and technically competent people. The Department of Wildlife, Fisheries and Aquaculture offers a major in Wildlife, Fisheries and Aquaculture Science designed to provide students with a curriculum that has foundations in biology, ecology, natural resources management, social sciences, computer science, and other contemporary educational needs for natural resources professionals. Six concentrations are available to students: wildlife, fisheries and aquaculture science, conservation law enforcement, wildlife veterinary medicine, wildlife pre-veterinary medicine, wildlife agriculture conservation, and human-wildlife conflicts. The curriculum will prepare students for employment in natural resource professions within private, federal, or state wildlife, fisheries, or aquaculture sectors. Additionally, the curriculum ensures that students are eligible for employment upon graduation, as well as providing the academic background required for further post-graduate studies.

Students may proceed towards a DVM degree by taking the concentration entitled the wildlife pre-veterinary program. Students, upon completing the course work outlined in the wildlife pre-veterinary program, may apply for admission into the College of Veterinary Medicine. Alternatively, students accepted into the early entry veterinary program, upon completing the wildlife pre-veterinary program satisfactorily, may be admitted into the College of Veterinary Medicine. There also is an opportunity to pursue, with an additional year, a M.S. degree in Veterinary or Wildlife Science. Upon successful completion of course requirements, the student will graduate with a B.S. degree in Wildlife, Fisheries and Aquaculture Science, pre-veterinary concentration at the end of the fourth year, and a DVM at the end of the seventh year.

Course work in all concentrations enables students to fulfill the course work requirements necessary to become Certified Wildlife Biologists by The Wildlife Society. The Wildlife, Fisheries and Aquaculture Science concentration exceeds requirements for certification by the American Fisheries Society as an Associate Fisheries Scientist.

The Wildlife, Fisheries and Aquaculture Science Major is designed for completion within four years, but some students may not complete the program in that time because of course scheduling or other constraints. Transfer students are encouraged to begin course work at MSU by the end of their sophomore year to enable graduation in four years. Transfer students should be aware that course work taken elsewhere may not necessarily be accepted toward a degree in Wildlife, Fisheries and Aquaculture Science. Only course work determined by the Wildlife, Fisheries and Aquaculture Department to be equivalent to required course work will be accepted. Additionally, no course work will be considered for acceptance unless a grade of C or better has been earned. Correspondence courses will not be accepted toward the Wildlife, Fisheries and Aquaculture Science degree. Transfer students with a grade point average less than or equal to 2.0 may not be admitted automatically into the Wildlife, Fisheries and Aquaculture Science major. Permission to enroll depends on specific circumstances and the

requirements of the Wildlife, Fisheries and Aquaculture Science major. In addition to University and College requirements, students must maintain a C or better in Wildlife and Fisheries Science major core courses taught within the College of Forest Resources. These courses are concentration specific. Students in the Wildlife Pre-veterinary program, interested in pursuing the Veterinary Medicine program, must meet all admission requirements by the College of Veterinary Medicine.

Conservation Law Enforcement Concentration (CLE)

Advisor: Dr. Kevin M. Hunt
Room 205A Thompson Hall

This concentration is designed for undergraduate students who wish to seek employment immediately following receipt of a B.S. degree and wish to obtain positions related to natural resource law enforcement (e.g., conservation officers, park rangers) or wildlife managers (not biologists). Students may, upon graduation within this concentration, continue on to graduate school in the human dimensions-law enforcement or wildlife arenas. Starting salaries, on average, would be less than with a M.S. degree.

Wildlife, Fisheries and Aquaculture Science Concentration (WLFS)

Advisor: Dr. Jerrold Belant
Room 215 Thompson Hall

This concentration is designed for undergraduate students who wish to pursue one or more advanced degrees (M.S., Ph.D.), as it prepares students for graduate school. Employment following this B.S. program is possible, but competition for jobs may be keen. This concentration is intended for serious, academically strong students, who maintain an A-B grade record (GPA 3.0), which is the minimum required for admittance into graduate schools.

Wildlife Pre-Veterinary Concentration (PVSF)

Advisor: Dr. Robbie Kroger
Room 205A Thompson Hall

This integrated curriculum allows the students to pursue a 3 + 1 undergraduate degree program in Wildlife and Fisheries Science for three years and then, if accepted, matriculate into the Veterinary Medicine program in College of Veterinary Medicine. Successful graduates of this program are qualified to apply for Certified Wildlife Biologist with The Wildlife Society as well as being qualified to practice veterinary medicine.

Note: Mississippi State requires a minimum of 124 hours for the undergraduate degree. Therefore, to qualify for the B.S. degree in Wildlife and Fisheries Science, a student **MUST** complete the three years of the listed undergraduate course work (114 hours) in the wildlife pre-veterinary program **AND** also successfully complete the first year in the Veterinary Medicine curriculum.

Wildlife Veterinary Medicine Concentration (WFVM)

Advisor: Dr. Robbie Kroger
Room 205A Thompson Hall

This integrated curriculum allows the students to pursue a four-year undergraduate degree program in Wildlife and Fisheries Science and then, if accepted, matriculate into the Veterinary Medicine program in

College of Veterinary Medicine. Successful graduates of this program are qualified to apply for Certified Wildlife Biologist or apply to graduate school in wildlife-related fields.

Wildlife Agriculture Conservation (WLAC)

Advisors: Dr. Samuel Riffell
Room 205A Thompson Hall

This curriculum provides the educational background for students pursuing careers as wildlife biologists or conservationists in agricultural areas which require a strong background in both wildlife biology and agricultural science. Successful graduates of this program are qualified to apply as Certified Wildlife Biologists to The Wildlife Society, and will meet minimum educational requirements for NRCS conservationist positions. Students completing this concentration may seek employment immediately following graduation. Students will be equally prepared to pursue one or more graduate degrees (M.S., Ph.D.) in wildlife biology and related natural resource fields.

Human-Wildlife Conflicts Concentration

Advisor: Dr. Jerrold Belant
Room 205A Thompson Hall

This curriculum provides the educational background for those students wishing to pursue a career as wildlife biologist with a strong background in wildlife damage management to resolve human-wildlife conflicts. Successful graduates of this program are qualified to apply for Certified Wildlife Biologist with The Wildlife Society. Students completing this concentration may seek employment immediately following graduation; however, competition for positions may be intense. Students will be equally prepared to pursue one or more graduate degrees (M.S., Ph.D.) in Human-Wildlife Conflicts or other areas of Wildlife Science.

General Education Requirements

English Composition

EN 1103	English Composition I	3
or EN 1163	Accelerated Composition I	
EN 1113	English Composition II	3
or EN 1173	Accelerated Composition II	

Mathematics

MA 1613	Calculus for Business and Life Sciences I	3
or MA 1713	Calculus I	
ST 3123	Introduction to Statistical Inference	3

Natural Science

BIO 1134	Biology I	4
BIO 1144	Biology II	4
See concentrations for additional requirements		1

Humanities

CO 1003	Fundamentals of Public Speaking	3
Writing Requirement		
AIS 3203	Professional Writing in Agriculture, Natural Resources, and Human Sciences	3
or MGT 3213	Organizational Communications	
or BIO 3013	Professional Writing for Biologists	

¹ All electives chosen from a list approved by the Department of Wildlife, Fisheries and Aquaculture.

² Note: Pre-requisites and co-requisites are strictly enforced in the College of Forest Resources. It is the student's responsibility to be aware of pre-requisites and co-requisites for all courses required in his or her program; pre-requisites and co-requisites are identified in the Course Description section of this Bulletin.

Choose one of the following concentrations:

The Concentrations: The academic concentrations within the Wildlife and Fisheries Science Major are offered to enable students to develop an academic background that is suited to their professional career goals. Each concentration has been developed to supplement the core curriculum which provides the basis for the wildlife and fisheries science major, regardless of the area of expertise desired by the student.

Conservation Law Enforcement Concentration (CLE)

Advisor: Dr. Kevin M. Hunt

Courses to be taken in addition to those of the core curriculum include:

PHI 1123	Introduction to Ethics	3
or PHI 3013	Business Ethics	
SO 1003	Introduction to Sociology	3
PSY 1013	General Psychology	3
CH 1043	Survey of Chemistry I	3
CH 1053	Survey of Chemistry II	3
CH 1051	Experimental Chemistry	1
PSS 3303	Soils	3
PSS 3301	Soils Laboratory	1
CRM 3103	Contemporary Issues in Criminal Justice	3
SO 3313	Deviant Behavior	3
SO 3603	Criminological Theory	3

WFA 4253	Application of Spatial Technologies to Wildlife and Fisheries Management	3
WFA 4313	Fisheries Management	3
WFA 4463	Human Dimensions of Fish and Wildlife Management	3
WFA 4433	Mammalogy	3
WFA 4443	Ornithology	3
