

Course Numbering Information

All course numbers consist of four digits, of which the first (left) digit indicates the level of preparation required and the fourth (right) digit indicates the number of semester hours. The two middle digits are reserved for the departments to distinguish one course from another. A fourth digit of zero (0) means that credit is variable to be fixed in consultation with the professor (e.g., ACC 4000 Directed Individual Study).

Courses that are in close sequence, such as two semesters of a survey course or a sequence of numbers for a seminar in a particular field, may be listed with a hyphen (-) between the two four-digit numbers (e.g., **AGN 8711-8731 Seminar**).

When the same course is offered on both undergraduate and graduate levels, two numbers are used to designate the two levels of credit (e.g., EN 4333/EN 6333 Southern Literature). Students enrolled for graduate credit will be required to complete assignments above and beyond those students enrolled for undergraduate credit.

The following course numbers, 4990, 6990, and 8990, designate Experimental Courses and will be used for no more than two years unless an extension is granted.
