Master of Science in One Health

Master of Science in One Health- Non-thesis

WFA 6863	Principles of One Health ¹	3
ONEH 6023	Disease Management ¹	3
ONEH 8033	Quantitative Methods in One Health	3
ONEH 8043	Systems Analysis and Transdisciplinary Methods	3
ONEH 8053	One Health Leadership and Policy	3
ONEH 8063	One Health Capstone	3
Electives ²		12
Total Hours		30

At least 12 credit hours must be 8000 level or higher. All 30 credits must be graded.

1. A student that has taken these courses for undergraduate credit may use the undergraduate credit to satisfy the graduate requirement for the course; however, they must substitute another graduate-level course selected from the additional approved elective course list to fulfill 30 credit hours of graduate study.

2. Electives must be related to One Health and approved by the Director of One Health Graduate Studies. Concentration options in Rural and Community Health, Safety and Resilience, and Policy and Governance are available. The list of approved electives for each concentration is maintained by the Director of One Health Graduate Studies.
